Adding extras

De Koffiejongens

Your luxury holiday home is standard equipped with a Nespresso coffee machine, with which you can prepare the most delicious cups of coffee at any time of the day. De Koffiejongens cups are available at the reception for €5.50 per strip (10 cups) You can choose from the types below:

- Ristretto
- Espresso
- Lungo
- Lungo Forte
- Nespresso Decaf

Where does De Koffiejongens stand for?

All coffee from De Koffiejongens is certified. This means that by drinking this coffee, they contribute to better living conditions for the coffee farmers and their families. What's more, you can be sure that your coffee has been grown with respect for nature.

On the way to 100% compostable cups

De Koffiejongens are busy developing cups that you will soon be able to throw into the green waste. The biggest challenge they face is making the cups airtight. If you don't do that (well) then your coffee will become old and tasteless within a few weeks. That's why they now use cups with an aluminium core. 100% airtight, 100% fresh coffee. But, fair is fair: aluminium is not the best material for the environment. It takes a relatively large amount of energy to make aluminium and it lasts forever. Plastic is a material that is less harmful to the environment. That's why De Koffiejongens keep the use of aluminium to a minimum: our cups consist of around 5% aluminium. The rest is plastic.

Sustainable

De Koffiejongens do everything possible to get the coffee as sustainable as possible at Gooilanden. For example, all the coffee is packed by employees with a distance to the labour market. Normally they may find it more difficult to get a job, but for us they are indispensable! And they pack the coffee in packaging that consists of at least 95% recycled paper. They deliver 95% of the orders by bike or on foot. A lot less polluting and healthy for the coffee boys too.

Bicycle for rent

At Suitelodges Gooilanden Stelf bikes can be rented for € 12.50 per day at the reception.

Tip: download the ANWB cycling route App and compile the most beautiful routes: <https://www.anwb.nl/fietsen/voorbereiding/fietsen-app>

Other

Green!

Sustainable business practices are very important to Dutchen.

In the maintenance of our parks we use as much sustainable materials as possible.

For example, the homes in our parks are cleaned with eco-labelled eco-friendly products. An eco-label is a label that is awarded to products or services that are less environmentally harmful than qualitatively comparable products or services, based on several predetermined criteria.

In addition, toilet paper with the fsc quality mark is used in the homes. By using FSC, we directly contribute to the protection of our global forests and to a healthy living environment for humans and animals worldwide. Because you give the forest economic value in this way, you ensure that it is preserved.

Our aim is to contribute to promoting environmental awareness among our employees and suppliers. We kindly ask you to consciously apply some simple daily actions during your stay at our parks.

You can also ensure a sustainable stay by paying attention to several points.

- In the evening and when leaving your holiday home, set the thermostat to a lower level.
- When not charging equipment such as mobile phones, unplug the charger from the wall outlet.
- Use water economically while showering, brushing your teeth and washing your hands.
- Separate your glass, paper, plastic and garbage in the appropriate waste containers at the entrance to the park.
- Do not leave lights on unnecessarily.

Nature

Known as a busy water sports area, the lakes of Loosdrecht also offer peace and quiet. Many aquatic plants and birds live in the Vuntus and Breukeleveense lakes. An eldorado for hikers, cyclists and canoeists who love nature.

The Loosdrechtse Plassen are perhaps the most famous of all the Vechtplaspen. Favoured by water sports enthusiasts and in summer it can be quite busy. But this lake area also has a different face. In the quiet areas such as the Vuntus and Breukeleveense Plas live many aquatic plants and birds.

Loosdrechtse Plassen is a collective name for all lakes around Loosdrecht, such as Wijde Blik, Vuntus, Loenderveense Plas and Breukeleveense Plas.
